CORPORATION LIMITED

The FSK GMU is a stand alone unit designed for the monitoring of guard patrols. It incorporates up to 16 wire free patrol points and has the ability to report via GSM and / or radio transmitter to the control room. It can also send SMS messages to 10 selected cell phones, thus making it suitable for individuals / companies that don't have control rooms. When utilising the GSM network it is able to report events such as

- Guard Patrol Complete
- Guard Patrol Fail
- Guard Patrol too fast or too slow
- Guard Patrols missed and any other such events.

It has the facility of enabling the user to configure shifts and patrol start and end times.

Can be accessed remotely by the user on the internet and we offer the facility of emailing daily reports to the user and / or client. Patrol configuration is fully programmable and can be configured to suit the site. An on board remote control receiver can be used to report panic or guard assistance requests.
