

# TX75X PANIC PACK AND TX75X TX PACK

## Panic Pack

It is a self contained unit incorporating a 1.5 amp battery charger, 7.5 amp hour battery either a TX75X radio transmitter or a TX Cellular GSM Transmitter, a 433 Mhz code hopping receiver and an on board siren driver module. Its tamper proof housing facilitates easy installation and its on board battery and power supply ensures that there is always adequate standby power. It has an on board siren driver module that allows the user to have either an audible or silent panic.

## TX Pack

As a TX Pack it offers the user the advantage of being able to be linked to any alarm system and report signals via its hard wired inputs or full zone and user reporting via either its contact ID or serial ports. It offers the user the advantage of having its own power supply and battery which ensures that the radio or GSM transmitter always has adequate standby power.
